Fora Olive's high quality olive products are prepared at the Antgida Inc. Plant, a state-of-the-art facility in Havran district of Balıkesir in Western Turkey. Antgida Inc., one of the largest olive processing plant around the world, was founded in 1994, operated as a subsidiary of İşBank for many years and taken over in 2014 by Mehmet Mermer Group Companies, one of the most reputable and respected industrial groups of Turkey. The factory has 40.000 tones storage and 40.000 tones packaging capacity, making total capacity of 80.000 tons of table olives. The massive production facilities with more than 550 employees covers 70.000 m² in land and total area of 120.000 m², which makes Fora Olive the biggest olive factory in the world.

The selections of olives with unique and superior taste comes from the Mount Ida which located in the North of Aegean Sea. Producing in accordance with the highest international standards, Fora Olive's products are distributed all around Turkey and exported over 50 countries around the world, including the USA, the UK, Germany and England with its own brand, as well as private label products.

Fora Olive offers a wide range of product, both in black olives and green olives categories, such as pitted olives, sliced olives, whole olives, cracked olives and olive pastes. Each olive variety is processed and packaged by caring international standards and using high quality technology to reach your table fresh, hygienic and full ripe, rich flavor. Fora Ripe Whole Black Olives come forward with low salt, fat and calorie. When compared with the brand's other lower salt products, Fora Ripe Whole Black Olives provide 50% less salt and calorie. Also, the product is prepared with the largest olives which are harvested in Turkey, starting with L and XL calibers. In addition to black olives, Fora Olive produces green olive varieties, as well. Fora Grilled Green Olives are prepared with elaborately selected and harvested Domat variety green olives. After pitting the pits in high

technology machines, the olives are grilled in press lines. Pitted green olives are also presented by stuffing with red paper or pimiento. In order to preserve the taste and freshness, the stuffed green olives are pasteurized after packaging. Sliced black olives and sliced green olives are also included in the product portfolio of Fora Olive. Pitted olives are sliced with industrial machines and served for pizzas, salads, patisserie, pastas and appetizers. Apart from welcoming international tastes, Fora Cracked Green Olives and Fora Whole Green Olives are processed with international standards, too. Spanish style processing helps green olives to preserve both the taste and its natural color.

The fermentation process of green olives are completed in the underground tanks, each of which has 10 metric tons capacity. Black olives are processed in olive pools, as well as fermentation tanks with 10 metric tons capacity. The volume of ripe whole black olives oxidation is 18.000 metric tons per year.

Environmental responsibility is a major priority at Antgida Inc.'s processing plant. Waste and by-products generated during the preparation of olives are processed and treated in a manner that ensures that the environment is protected. Great importance is placed on hygiene and sterility in every step of processing. The company has been granted with Zero Waste Certificate by applying zero waste manufacturing system. Besides, most of the electricity used in production is met by solar energy thanks to the Solar Power Plant installed on the roof top of the factory. Antgida Inc.'s commitment to quality is apparent at every stage of production, from harvesting and processing to packaging and marketing. Antgida Inc. has been certified by ISO 9001, ISO 22000, ISO 14001, ISO 45001 regulations, Halal Food and Kosher, the BRC AA+ and IFS Quality Certificates.

During the process of Sele, one layer of natural black olives and one layer of salt are placed in the binds. The binds are rolled over in specific periods, in this way, natural black olives are covered with added salt. Sele Black Olives are cured only with salt and is notable for its rich, robust flavor. The process does not contain any artificial component, besides the olives are prepared and packaged with zero-touch principle.

Tinned products must be stored by rolling over the tin once in every 15 days for the product to preserve its taste and appearance.

Fora Ripe Whole Black Olives, which are preferred mostly by the ones who take care of health and form, provide 50% less fat and less calorie when compared with Fora Spanish Style Low Salted Olives. Besides, Fora Ripe Olives have the least salt ratio amongst the other products offered by the brand. The secret of Fora Ripe Olives is being harvested and produced before the olives reach their maturity. The low fattened olives are manufactured without adding extra salt. Thus, Fora Ripe Olives are number one olive choice of the ones who prefer to be nourished with low fat, salt as well as calorie.
